100%

Faculty/Staff Commitment

The Faculty-Staff Campaign that is an integral part of the overall comprehensive campaign at the College concluded in April 2008 with 100% participation of current full-time faculty and staff members with almost \$200,000 committed to a variety of projects in the campaign. President Wood, in announcing the results, said: "These impressive results indicate that, as a College, we believe we are headed in the right direction. The faculty and staff have indicated that though not perfect, we are moving forward in an encouraging and positive way ready to confront the challenges that are before us. Clearly, the people who comprise the workforce of this excellent institution are its strength. We are grateful for this show of support of DC's students and programs."
