

2021-2022

Local – PATH Center

McMaster Fellow

Sabrina Brown, Ph.D., Assistant Professor of Environmental Science – The purpose of this project is to provide produce and spices to the PATH Center Soup Kitchen, offering healthy alternatives to low-income residents of Defiance County. This will be accomplished by establishing a productive greenhouse at Defiance College.

McMaster Associate Fellow

Mollie Sorrell, Ph.D., Assistant Professor of Biology

McMaster Scholars

AJ Ramirez, Senior, Communication Studies – This project will expand awareness of Defiance College's greenhouse efforts and their partnership with the PATH Center through the creation of an educational podcast and documentary.

Hallie Webb, Sophomore, Environmental Science and Restoration Ecology – The focus of this project will be to design and incorporate an efficient greenhouse layout for the produce grown in the Defiance College greenhouse. The produce will then be donated to the PATH Center and distributed to individuals in Defiance County.

Sierra Worrell, Sophomore, AYA Life Science and Environmental Science – The goal of this project is to create an informational podcast that will educate local school students about environmental issues, sustainability, and the nutritional value of healthy eating.
